ABOUT ME

Currently finishing my studies and available for new opportunities in Geneva or surrounding areas from September 2023. With a solid web development background but also a strong curiosity, I am open to new fields and technologies.

EDUCATION

2020 - 2023

Computer science engineering degree

ENSSAT Lannion - Rennes 1 University

2018 - 2020

Computer science two years university degree

IUT de Vannes - South Brittany University

WORK EXPERIENCE

Frontend developer intern

03.23 - Today

Meteomatics AG - St. Gallen (CH)

Worked on a React-based web application for wind trajectory. Created a high-speed algorithm to compute wind trajectory using API data, and integrated it into the application. Proficient in React, algorithm design, and API integration.

Frontend developer apprentice

2020 - 03.23

Orange Labs - Rennes (FR)

Worked for two years as part of a web development team to establish a common code base for Orange TV. Conducted research on frameworks such as React, Angular, and Vue, and contributed to developing a high-performance web app with seamless UX on devices with limited resources.

Software developer apprentice

2019 - 2020

Meteo France - Lannion (FR)

Apprenticeship focused on satellite image processing with Python. Wrote a program in Python to extract and process raw satellite data from American lightning imagers, producing high-quality lightning images for analysis. Proficient in Python programming, data processing, and image manipulation.
